Education

Polytechnic University of the Philippines
Bachelor of Science in Computer Engineering.

Manila, Philippines
2024-Present

Teresa National High School – Senior High School
Accountancy, Business, and Management. GPA 95%

Teresa Rizal, Philippines
2022-2024

Teresa National High School
Junior High School. Grade: 93%

Teresa Rizal, Philippines
2018-2022

Relevant coursework: Programming Logic and Design, Object Oriented Programming, Computer Hardware Fundamentals, Engineering Data Analysis, Data Structures and Algorithms, Operating Systems

Skills

Basic Python Programming, Tkinter (GUI Design), Hardware Troubleshooting, System Unit Assembly, LAN Cable Crimping (RJ45), Basic UI Design.

Problem-solving, Collaboration and Teamwork, Detail-oriented

Academic Project & Experience

Structura: DSA Simulator | Python

2025

- Developed a Python-based Data Structures and Algorithms (DSA) simulator designed to help students visualize and understand fundamental DSA concepts through interactive graphical simulations.
- Covers specific DSA concepts such as Stack, Queue, Binary Tree, Binary Search Tree, and Recursion.
- Utilized Python, Tkinter for GUI development, and Pillow for image processing, following Object-Oriented Programming (OOP) principles.

Mini Bank Account Application | Python

2025

- Developed a GUI-based mini banking system using Python and Tkinter.
- Implemented core features including login authentication, balance tracking, deposit/withdraw functions, and transaction history.
- Focused on user interface (UI) design and the application of basic Object-Oriented Programming (OOP).

LAN Cable Crimping and Network Setup | Hardware

Manila, Philippines
2025

- Prepared and crimped RJ45 connectors for CAT5e/CAT6 LAN cables.
- Established and tested peer-to-peer connections between computers.
- Performed basic network troubleshooting to ensure consistent connectivity and proper configuration

Computer Hardware Troubleshooting |
Hardware

Manila, Philippines
2025

- Disassembled and reassembled system units to inspect, clean, and replace internal components.
- Identified and resolved common hardware issues such as loose RAM or power supply failures.
- Ensured proper cable management and safe handling of sensitive electronic parts.

Member, Google Developer Groups on Campus PUP |

Manila, Philippines
2025

Web Development Department

- Participated in technical webinars focusing on Artificial Intelligence (AI), Web Development, and UI/UX design.
- Engaged in collaborative learning activities and discussions regarding UI/UX principles with UXPH and PUP technical organizations.

Member, AWS Cloud Club – PUP

Manila, Philippines
2025

- Attended specialized webinars covering AI, Cloud Computing, Cybersecurity, and version control using Git & GitHub.
- Explored membership tracks within AI and Web Development to further technical specialization.

Member, Cisco NetConnect – PUP

Manila, Philippines
2025

Manila, PH AI & Data Science Department

- Participated in educational webinars and training sessions focused on AI integration and Networking fundamentals.

Interests

Hardware System, Software Development, Network Infrastructure, Artificial Intelligence and Machine Learning, and UI/UX Design

Language

Filipino, English
